BLAKE'S PATENT FIRE-PROOF PAINT.

84 PEARL STREET, NEW-YORK.

This extraordinary substance is found in a stratum of rock in Sharon, near Akron, Ohio. When taken from the mine it has all the appearance of the finest Indigo, and is no harder than cold tallow, but exposure a few days to the atmosphere turns it to a hard SLATE or STONE. It is reduced to a fine powder, mixed with Linseed Oil to the consistancy of thick paint, and applied with a brush; and after exposure for a few months to the atmosphere, this coating becomes a perfect slate, protecting whatever covered from the action of the WEATHER and from FIRE. It has been found upon analyzation by DR. CHILTON, of this city, to consist of larger proportions of Silica, Alumina Prot. Oxide of Iron and Magnesia, with lesser of Lime and Carbon; the transition, therefore, according to the opinion of Drs. Chilton and Locke, from the liquid paint to the hard slate is accounted for according to nature's own laws; as the oil absorbs and evaporates by the action of the atmosphere, the powerful adhesive attraction incident to the Prot. Oxide of Iron, binds and attracts not only the particles together, but also to the substance covered, so that the longer on, the more powerful the attraction, consequently the harder the slate, and the closer it will adhere to the substance applied. It is being used extensively for covering roofs of either shingles, matched boards, tin, zinc, sheet iron or thick paper. There is nothing equal to it for Steamboat or Car decks, and for all kinds of Iron, as it forms a coating nearly as hard as the iron itself, and never cleaves off, it is a perfect DESIDERATUM for old leaky Tin roofs as it enters into all the cracks and forms a complete stone coating over the whole roof.

It is used upon brick walls both as a paint and cement. It forms a perfect stone coating, through which not a particle of moisture can pass. In fact, it can be used upon anything you wish to protect from fire or weather. The Government granted me, on the 28th March, 1848, a patent for the discovery of its application as a fire and weather proof composition, or artificial slate.

The Fair of the American Institute, held last Fall, awarded me a medal, and the Fair of the State of N York, a Diploma, The Examining Committee of the American Institute, of whom Dr J. R. Chilton was Chairman, and had some three years previous analyzed it, states in the report, that it was an article superior to anything that had been presented as a weather and fire-proof covering.

CERTIFICATES.

This may certify that we have been acquainted with "Blake's Patent Fire Proof Paint" for some years and are well assured that it is really what its name indicates—FIRE-PROOF, we consider it a better fire-proof than Tin or Zinc, and will insure buildings well covered with it at a much lower premium than those covered with the above mentioned metals.

H. K. SMITH, Sec Summit Mut Fire Ins. Co.
DAN'L S. LEE, Agent of Medina Co. Mutual Ins. Co.
D. B. HADLEY, Agent of Stark Mutual Insurance Company.

BLAKE'S PATENT FIRE-PROOF PAINT.

Look out for Fraud!

For the past few months there have been scores of individuals engaged in digging, grinding, and sending to a distance all kinds of STUFF, much of it no better than dirt from the street, or clay from any bank, calling it all good Fire and Weather Proof Paint, like mine they say, but of a different colour. Now it is impossible for them to know anything of the *weather-proof* qualities of this counterfeit article, as it has not yet been two years since they first commenced digging it and according to the opinion of Dr. Chilton, of New-York, and Dr. Lock, of Cincinnati, this *stuff* is entirely worthless as an outside coating, as it has neither the *Red* or the *Black Oxide* of Iron in it. consequently there can be no cohesive attraction; therefore, as the action of the atmosphere destroys the oil with which it is applied, it will wash or rub off like chalk or whiting. I have the certificates at my office of more than twenty inhabitants of Sharon, Ohio, where the paint is made, who state that they have used this counterfeit stuff and it has proved entirely worthless, and there has been such an entire failure of the different kinds of stuff got up and sold as fire-proof paint, except Blake's that his only is considered worth using. Others are endevoring to sell an article, similar to mine in violation of my patent, contending that my patent is invalid and that they have a right to manufacture and sell the substance.

I will state that a few weeks since I agreed with an agent here of the infringing parties in Ohio, to submit my Letters Patent to referees in order to test its validity and agreed in case the referees concur in the opinion that the patent was not granted in conformity with the United States patent Laws and is *invalid*, I was to let him go on and sell without interruption, but in case they concur that it is *valid* he agrees to sell no more of said paint, We therefore on the 15th May submitted the case to the Hon. Chesseldon Ellis, former member of Congress and C. M. Keller, Esq. Counsellors at Law in the City of N. Y. as referees, and after examination they on the 21st. inst. reported that they concur in the opinion that the patent is *valid*, and at the close of their decision say "we are clearly of the opinion that Mr Blake's Letters Patent are *valid* and that any one who prepares this earth in any manner substantially similar to the mode described and applies it to any of the purposes enumerated in his patent is liable to him for any damages that he may sustain which damage he can recover at Law.

Signed C. M. KELLER,
CHESSELDON ELLIS.

Daniel Webster's Opinion of the Patent.

In order that the public might have the benefit of the opinion of one who has from his position and experience acquired a notoriety broader than the Union, I have submitted my Letters Patent to the Hon Daniel Webster for the purpose of obtaining his opinion as to its *validity* and after a thorough examination concludes his report as follows "I have no doubt whatever that Mr. Blake's Patent is good and valid, that it protects him in the sole preparing, making, and selling the Artificial Slate or Hard Paint, and that any person who shall make, prepare, sell, or use his article, or any article formed essentially from the same material, and by substantially the same manner of preparation of treatment, is liable to him for an infringement of his right, and answerable in damages according to the provisions of the Patent Laws of the United States.

Washington, March, 25th 1850 Signed DANIEL WEBSTER.

I have just commenced three suits against different parties, and am determined to prosecute every person who infringes the patent; and those individuals who have given credence to those pirating my rights will soon have an opportunity of defending themselves before a court of justice.

Extract from the New-York Sun.

Blake's Patent Fire-proof Paint.—We last season procured a sufficiency of this most singular and valuable article to cover the roof of the *Sun Building*, and now find that it proves all that was said of it, as there is not a check or crack to be seen, but is now one continued sheet of stone over the whole roof, and the tread upon it does not seem to effect it although it is upon tin, the roof leaked badly before it was applied, but has been perfectly tight since. We understand that Mr. BLAKE spent his whole time, for more than three years, in experimenting with the pigment, at length he discovered that by reducing it to a powder and mixing it with oil, he had a compound that could be as easily applied as ordinary paint, and in a few months would become a perfect *slate* or coat of mail, protecting whatever covered from the action of the weather and fire. He now might have well exclaimed "*Eureka*" *i e* "I have found it," for it was a *desideratum* that had for centuries been sought invain. This paint has proved so popular that hundreds we understand are getting up all kinds of worthless stuff, and selling it as Fire-Proof Paint. it therefore will be well to be particluar and see that every package has Mr. BLAKE'S stamp upon it, as it is a patented article, therefore if they get that that makes the genuine artificial slate of others they expose themselves to a prosecution for an infringment of his patent, but if a worthless counterfeit article, of course they loose their money. The genuine article can be found at the *gen* Depot, No. 84 Pearl Street, by WM. BLAKE, the patentee.

The public therefore will be particular and see that every package has my brand upon it, for if they get the powder from others that will make the genuine Artificial Slate, they make themselves liable to me for an infringement of my patent, and if they get the spurious article of course loose the money they pay for it.

WILLIAM BLAKE,
84 Pearl Street, New-York.

COMSTOCK LUCIUS S. 57 John, h. 70 Union pl. Traders who do not wish to countenance piracies upon others' preparations' and who wish to preserve moral principle and also their own interest, are asked to observe these notices. It shall be made decidedly for the profit of all not to deal in the counterfeits or imitations at any price. Notice.—All preparations heretofore known as "Comstock's"or Comstock & Co.'s, always belonged and now belonging exclusively to Dr. Lucius S. Comstock; and though the signature of Comstock & Co. will be continued, this extra label with the fac simile signature of Dr. L. S.C. will in future designate the genuine. All others must be spurious.

"Nor shall any of the firm have any right, after the termination of the partnership, to use the present trade marks or names of articles of the present firm of Comstock & Co., or Dr. L. S. Comstock except it be said L. S. Comstock.
Geo. Wells Comstock,
Jno. Carlton Comstock."
Dated January, 1849.
The partnership began March, 1849, and ended virtually in eight months, and formally August 1st. 1850.

ıg made extensive additions to their Machine Works, are now prepared to execute orders with despatch for their

ıder Printing Machines, for Newspaper, Book and Job Work, **Washington and ıith Hand Presses, Card Printing Machines, Proof Presses, Hydraulic Presses** with wrought iron Cylinders, **Standing Presses** of various kinds, **Chases, Cases, Galleys, Furniture, Stands, Imposing Stones**; also, **Lithographic and Copperplate Presses, Binders' Materials, &c.** all of which are manufactured under their own immediate supervision.

CATALOGUE OF PRICES, containing Cuts and description of many of the Machines, with direc- or putting up and working them, may be had on application by mail or otherwise.

inters, Publishers and others, wishing to purchase, will be furnished with an estimate for an office or y in detail, if desired.

ıey keep constantly on hand at their warerooms, or furnish at short notice, on the most reasonable *every article necessary for a complete Printing Office, including type, ink, &c.*

William Van Norden, Printer, 120 Fulton Street, N. Y.

CAST STEEL SAWS.

R. HOE & CO.,

Nos. 29 and 31 GOLD STREET,

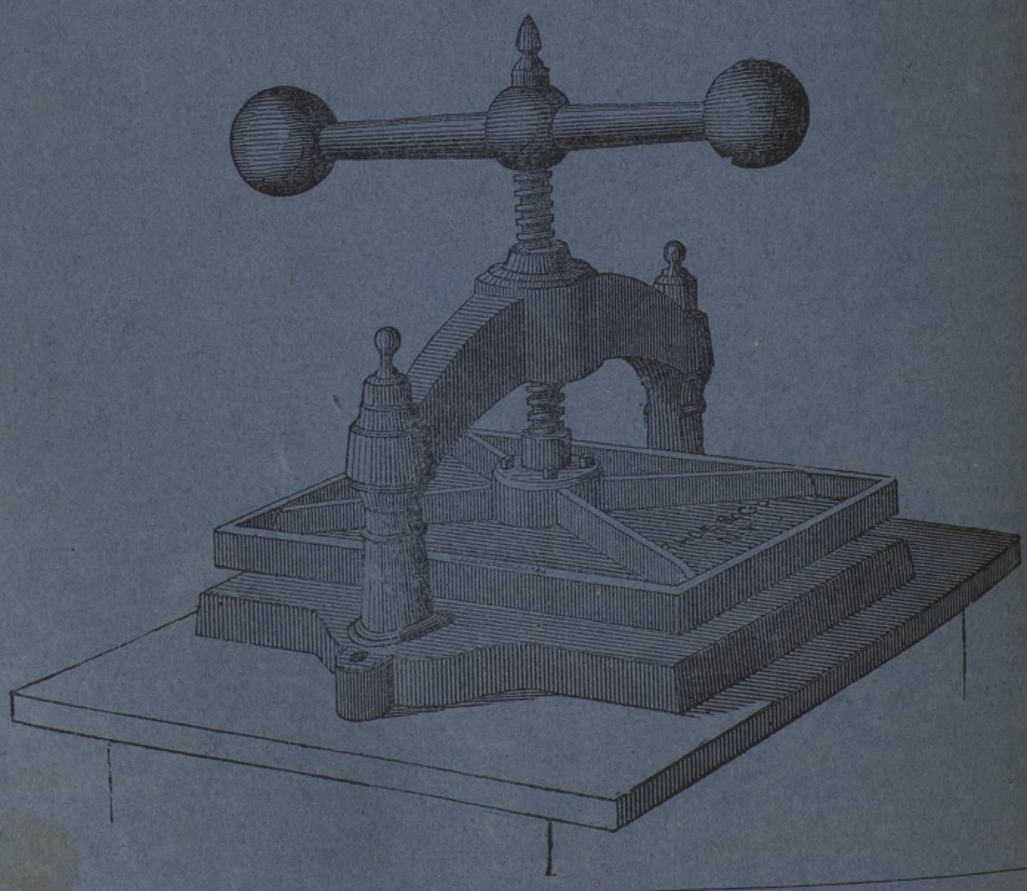
Also manufacture *Superior Warranted Cast Steel* **Mill, Pit, Cross Cut, Circular and other Saws, Mandrills, &c.**, a supply of which they have for sale at their Warerooms.

EXTRACT FROM A REPORT MADE BY A COMMITTEE OF PRACTICAL AND SCIENTIFIC GENTLEMEN, APPOINTED BY THE AMERICAN INSTITUTE.

The Special Committee of the American Institute, to whom was referred the examination of Richard M. Hoe's Machines for grinding Saws, report, that they visited the extensive manufactory of R. Hoe & Co. at the corner of Broome and Sheriff streets, and there witnessed the machines in question in operation. There are two of these, one for grinding Long Saws, the other for grinding Circular Saws. * * * *

The advantages to be obtained from the use of these machines are highly important, as will manifestly appear to those who are accustomed to use saws of the description which they are calulated to grind.

Their merit consists in the power which they place at the disposal of the workmen engaged in the manufacture of saws, to make them perfectly true and regular in thickness, or thick or thin at any particular part they please; thus preparing the cutting edge of Long Saws to operate with less set, and strengthening Circular Saws by gradually increasing them in thickness from the cutting edge to their centre.



The truth and uniformity of their surface, make in all cases, less set in the saw teeth necessary, and on this account it will take less power to drive the saws made by these machines than is required for the use of the ordinary hammered and ground saws; besides they will not require so frequent sharpening, be less liable to become heated, and by cutting relatively a much narrower curf, produce a saving in timber, which, in some varieties, is an object of considerable importance.

Your committee are of unanimous opinion, that in the apparatus invented by Mr. R. M. Hoe, as above described, he has displayed great ingenuity and tact in the adaptation of machinery to the production of results in the manufacture of saws, which may with propriety be denominated the *ne plus ultra* of the art.

[Signed,] JAMES HAMILTON,
EDWARD CLARK,
THOMAS B. STILLMAN,
JAMES WILSON,
JOSEPH CURTIS.

COPYING PRESSES.

R. HOE & CO., manufacture and keep on hand various kinds of **Copying Presses**, of which one is here represented. The impression surfaces are turned perfectly true, so that a uniform and perfect copy may be obtained with ease and expedition. Copying Ink, Copying Paper, and Copying Books, of the best quality.
